

PrestaShop module: Planning Delivery By Carrier

Description

This module, specially developed for the CMS e-commerce Prestashop allows the end user to choose the date and time slot for delivery, depending on availability merchant.

Features:

- Configure dates of deliveries and time slots for each carrier
- Ability to display a summary of deliveries within the next 7 days on the homepage of the BO.
- Manage the number of days to provide the final customer (between first and last selectable date).
- Management of days of the week for which delivery is possible.
- Ability to enable or disable management slots.
- Management of independent slots for each day of the week.
- Management of the maximum number of deliveries for each time slot.
- Exception Managment
- Send an email to the customer to remind him of the date and time slot he chose for delivery.
- Create a tab in the administration summarizing all deliveries performed by the merchant.

1) Installing the 'Planning Delivery':

- Upload the module in the directory 'modules' on your PrestaShop store.
- Since the administration, install the module located from the 'Modules'.

2) Module Settings:

The screenshot shows the 'Globals settings' tab for the Carriers module. It includes checkboxes for 'Prestashop5' and 'My carrier', both of which are checked. Below this is a section for 'Listing homepage BO' with radio buttons for 'Active' (selected) and 'Inactive'. A list of order statuses is shown, with 'Awaiting cheque payment' through 'Shipped' selected. A 'Save' button is at the bottom.

Globals settings

Carriers Prestashop5 ☒ My carrier ☒
Select the carrier for which the choice of the delivery date will be activated.

Listing homepage BO ☒ ☐ ☐ ☐
Active recall of deliveries to be made on the homepage of Administration.

Select the status of orders you do not want to appear in the summary of the deliveries to be made. You can select more than one by pressing the CTRL key.

Day

- Awaiting cheque payment
- Awaiting PayPal payment
- Canceled
- Delivered
- File under study Sofinco
- Financing Agreement Sofinco canceled
- On backorder
- Payment accepted
- Payment error
- Payment remotely accepted
- Preparation in progress

Save

- **Transporteurs :**
Pour les transporteurs sélectionnés, le choix de la date de livraison sera proposé à l'internaute .
- **Listing on the homepage of the B0:**
If this option is selected, the list of delivery for the next 7 days appear on the home page of the Back Office, and a link to a page summarizing all deliveries to be made.

Exceptions :

The screenshot shows the 'Exceptions' tab. It has a text input for 'Exception' and two date inputs for 'Date from' and 'to', followed by an 'Add' button. Below this is a section titled 'Restricted dates' showing a date range from Tuesday 01 January 2013 to Tuesday 22 January 2013.

Exceptions

Add as many exceptions as necessary.

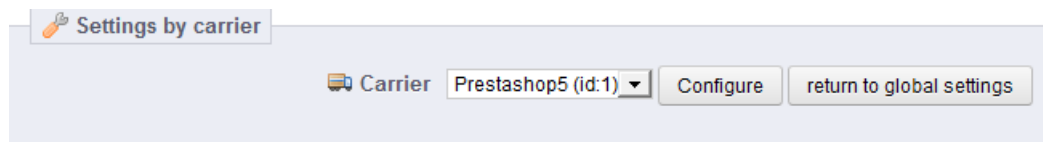

Exception Date from to Add

Restricted dates

From Tuesday 01 January 2013 to Tuesday 22 January 2013

- Can choose the dates or delivery will not be possible (vacation, holiday, etc ...).
These dates are not selectable on the calendar displayed to the user.

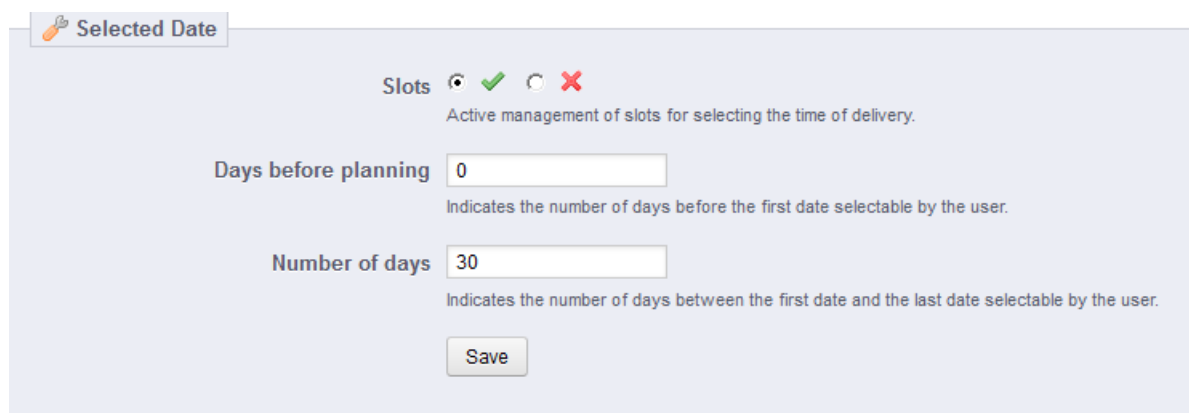

3) Configuration for each carrier:

The screenshot shows a configuration interface for a carrier. At the top, there is a tab labeled 'Settings by carrier' with a wrench icon. Below the tab, there is a section for 'Carrier' with a dropdown menu currently showing 'Prestashop5 (id:1)'. To the right of the dropdown are two buttons: 'Configure' and 'return to global settings'.

- Sélectionnez le transporteur à configurer. Une fois sur la page de configuration du transporteur, vous pouvez revenir à la configuration générale du module en cliquant sur 'retour à la configuration générale'.

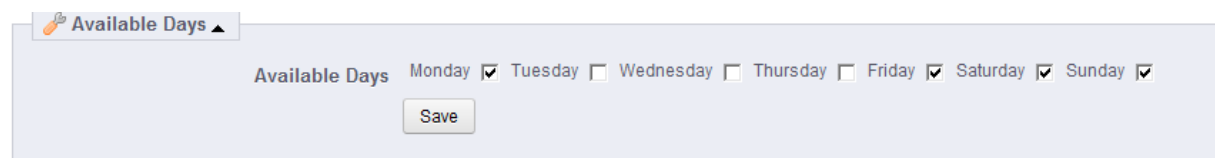

Parameters

The screenshot shows a configuration interface for 'Selected Date'. At the top, there is a tab labeled 'Selected Date' with a wrench icon. Below the tab, there is a section for 'Slots' with four radio buttons: the first is selected, the second has a green checkmark, the third is empty, and the fourth has a red X. Below the radio buttons is the text 'Active management of slots for selecting the time of delivery.' Below this, there are two input fields. The first is labeled 'Days before planning' and has the value '0'. Below it is the text 'Indicates the number of days before the first date selectable by the user.' The second is labeled 'Number of days' and has the value '30'. Below it is the text 'Indicates the number of days between the first date and the last date selectable by the user.' At the bottom, there is a 'Save' button.

- **Listing on the homepage of the B0:**
If this option is selected, the list of delivery for the next 7 days appear on the home page of the Back Office, and a link to a page summarizing all deliveries to be made.
- **Number of days before the first date:**
Indicates the number of days before the first date selectable by the user.
- **Number of days before the last date:**
Specifies the maximum number of days between the first and the last selectable date by the user.

4) Available days:

The screenshot shows a configuration interface for 'Available Days'. At the top, there is a tab labeled 'Available Days' with a wrench icon. Below the tab, there is a section for 'Available Days' with a row of checkboxes for each day of the week: Monday (checked), Tuesday (unchecked), Wednesday (unchecked), Thursday (unchecked), Friday (checked), Saturday (checked), and Sunday (checked). Below the checkboxes is a 'Save' button.

- Allows you to select the days for which delivery is possible.

5) Slots:

Slots ▲

From à

Label du créneau horaire

Customers max

Create a new time slot.
Once created, you must activate it for the desired days with the form below.
Be aware that the slots are independent in each language.
Max customers: Specifies the maximum number of customers for the time slot to add.

Actions	Slot	Customers	Actions	Slot	Customers
<input checked="" type="checkbox"/> <input type="checkbox"/>	Label: From 10 am to 12 am De: 10h00 A: 12h00	4	<input checked="" type="checkbox"/> <input type="checkbox"/>	Label: From 2 pm to 5 pm De: 14h00 A: 17h00	10

- Allows you to create different slots in their binding a maximum number of customer.
(Number of deliveries up to the time slot in question)

IMPORTANT: In order for the slots to be placed in the correct order when displaying the dropdown menu for choosing the user, you must precede the name of the slot by "x" or "x" is the number corresponding to the position of the slot.
(The position number will of course not displayed to the end customer)

ex: 1.8am to 10am

appear like this: 8am-10am
and come out on top.
